

# Timing is Everything

NEW

The **CAMCO eSwitch** is a programmable, multi-channel switch used to signal rotary position for accurate timing of component operation

- Easy to use
  - Set up and adjust the eSwitch with a simple windows program
  - Connect to the eSwitch with standard USB and 12-pin cables
  - No cycle cams to adjust
- Program up to 8 outputs with 4 signals per output
  - Use different channels to signal different operations such as starting and stopping an indexer or opening and closing a gripper
- Small and compact
  - 90 x 90 x 60 mm overall dimensions
- Tough and reliable
  - Enclosure is watertight and NEMA 4, 4x and IP66 rated
  - No mechanical parts
  - Use with shaft speeds up to 180 RPM
