DE-STA-CO's CAMCO® Rite-Link Conveyor Delivers High Speed Precision in a Compact Design

Energy efficient link system is more stable and accurate than roller chain

Auburn Hills, Mich., June 8, 2011 – DE-STA-CO, a worldwide leader in robotic tooling, workholding and flexible industrial automation solutions, announces the release of a new product: the CAMCO® Rite-Link conveyor.

Rite-Link's slim, compact design features narrow links, (30.4 mm wide) with 75 mm, 115 mm, or 150 mm pitches. There are five standard center distances available or a custom one can be provided, assembled, and tested for the customer's particular industrial or medical application, and can be used in either an over/under or carousel configuration.

The energy efficient Rite-Link requires no lubrication, so it is virtually maintenance free. Built with lightweight components, it runs quietly, even at higher operating speeds.

"Rite-Link is the perfect fit for manufacturers that have been looking for a cost-effective conveying solution that is more accurate and stable than roller chain," said Lou Wozniak, Product Manager for DE-STA-CO. "It's easy to install and integrate into any shop environment, and lends itself to flexible indexing with CAMCO®'s precision 115RSD rotary servo drive, or a customer's standard servo and planetary drive."

About DE-STA-CO

DE-STA-CO is a global automation and workholding company, providing productivity solutions for the industry since 1915. Quality, innovation, and service have made DE-STA-CO a leader in the design and manufacture of cost reducing, flexible automation solutions for industrial customers around the world.

The company is committed to the Team DE-STA-CO philosophy, a progressive approach to doing business that focuses on providing consistent, standard-setting service and products to every customer, regardless of geographic location.
