IMC-CAMCO-FERGUSON PUBLISHES NEW PRODUCT CATALOG

CHICAGO (April 25, 2005) – Industrial Motion Control LLC, also known as IMC, announces publication of the most comprehensive catalog in the industry for users of index drives and related products.

The 260-page, color document features more than 1,000 leading products under the Camco and Ferguson brands, including index drives, overload clutches, parts handlers, walking beam drives, precision link conveyors, servo-mechanical drives and accessories.

“This new catalog combines the best of both worlds – quality products from Camco and Ferguson,” says Jeff Peterson, IMC’s vice president of marketing. “This is the most comprehensive index drive catalog available today.”

As every member of IMC’s sales force has a technical background, customers receive unprecedented guidance when ordering. No engineering application or motion control challenge is too great for IMC’s sales professionals --- they are fully qualified to help select and specify the correct components for each machine design application.

IMC’s new catalog is free and is available in print or in electronic .pdf format. To order a print copy, call Jennifer Grahn at 847/215-5669. For a pdf version, visit IMC’s Web site at www.camcoindex.com.

A multiple-language, European version in English, French and German, showcasing IMC’s full line of metric products, is also available.

IMC is a leading manufacturer of precision cam-actuated index drives, parts handlers, in-line conveyors and custom cams. IMC serves designers, builders and users of specialty automation equipment worldwide with manufacturing facilities in both North America and Europe. IMC was formed with the merger of Commercial Cam Co. and Ferguson Co. in 2001.

IMC is an ISO-9001 registered and provides quality, value and service to machine builders and users worldwide.
